RE: 4720 Josephine Street, Denver, CO 80216

Dear Owners,

As part of the Vasquez Boulevard/Interstate-70 (VB/I-70) Superfund Site investigation, we took soil samples at your property to find out if there is too much lead or arsenic in your yard. ***The results show that your property does not require a cleanup.*** The levels of both lead and arsenic are below our cleanup levels. The soil sampling results for your property are as follows:

ADDRESS: 4720 Josephine St., Denver, CO 80216 **EPA Cleanup Levels**

Lead

145 parts per million (ppm) above 400 ppm

Arsenic

6 ppm above 70 ppm

This means that your property is not considered by EPA to be part of the VB/I-70 Superfund Site. EPA does not believe that further measures are necessary. You and your family are not at significant risk from lead and arsenic through ordinary contact with soil in your yard while playing, working, gardening, etc...

For further information, please feel free to contact myself or Patricia Courtney, EPA Community Involvement Coordinator at (303) 312-6631.

Sincerely,

Jennifer Chergo
